Addressable

Wireless
Smoke Detector

Model : PTSWSDX501

Datasheet

Outline

PineTree's PTSWLSD0X is a 9V battery operated Photoelectric Smoke Detector with built-in RF transmitter that utilizes mesh topology ensuring safe and reliable Wireless Communication. The detector is intended to be used with PineTree's Wireless Addressable Fire Alarm Control Panel and other compatible devices.

Designed for a range of commercial and residential applications, the smoke detector has internal buzzer, test button, wide transmission range and extended battery life for easy maintenance.

Technical Specification

Product Class	: Wireless - Addressable
Sensor	: Photoelectric
Power Supply	: 9V Battery
Housing	: ABS
Alarm Output	: RED LED, Alarm Tone
Operating Temperature	: -10°C to +55°C
Operating Humidity	: <95% Non Condensed
Addressing Method	: Electronic
