Integrated

Fire Alarm /
Public Address Control

Model: PTSFAPAC001

Outline

PTS-FAPA series of Integrated Intelligent Addressable Fire Alarm & Public Address control panel is bundled with fire detection followed by automated voice messages, spot announcements and user friendly operations are ideal for all commercial, residential and industrial applications. Panel features integrated voice alarm / announcement capability and utilizes addressable technology to broadcast information using Talkback / Public address units at specific location.

FAPA panels are available in various configurations with networking, expandable analogue loops and expandable audio channels. Standard features include multiple audio sources for music / audio playback, routine announcements, spot announcements and inter linking capability with centralized monitoring station.

Technical Specification

Product Class	: Addressable
Operating Voltage	: 230V AC ±10%-15% (nom)
Secondary Supply	: 2 x 7ah Battery
Relay Contact Rating	: 2/2A @ 30V DC
Wiring	: Class B
Networking	: Yes(Optional)
Interface	: 5"/7" TFT / Touch Screen
Housing	: Mild Steel
Operating Temperature	: -10°C to +55°C
Operating Humidity	: <95% Non Condensed

Features

TFT /Touch Screen display

Spot announcements

Faster evacuations

Remote monitoring & Control

Suitable for multi storey buildings

Expandable Loops

Multiple Audio Source

On board Self Test

Networking support up to 32 panels

User friendly programming interface

Approvals
